JANUARY / JANVIER

REGULAR PAPERS / ARTICLES ORDINAIRES

Sylvain Foucart, Jacques de Champlain, and Réginald Nadeau Modulation by β-adrenoceptors and angiotensin II receptors of splanchnic nerve evoked catecholamine release from the adrenal medulla 1

N. L. Stephens, A. J. Halayko, and B. Swynghedauw Myosin heavy chain isoform distribution in normal and hypertrophied rat aortic smooth muscle 8

Pierre L. Pagé, Hamid Hassanalizadeh, and René Cardinal Transitions among atrial fibrillation, atrial flutter, and sinus rhythm during procainamide infusion and vagal stimulation in dogs with sterile pericarditis 15

David E. C. Cole, Anne M. Thurgood, and Susan J. Whiting Increased serum sulfate after protein loading in adult humans 25

Harley Eklove and Rodney A. Webb The effect of L-glutamate and related agents on adenylate cyclase in the cestode *Hymenolepis diminuta* 28

Masataka Araki, Mitsuo Nakamura, Seiichi Takenoshita, Hirokazu Shoda, Yukio Nagamachi, and Shigeru Matsuzaki Effects of dexamethasone on the activity of histidine decarboxylase, ornithine decarboxylase, and DOPA decarboxylase in rat oxyntic mucosa 37

W. Wayne Lautt, Joshua Schafer, and Dallas J. Legare Effect of adenosine and glucagon on hepatic blood volume responses to sympathetic nerves 43

RAPID COMMUNICATION / COMMUNICATION RAPIDE

Qiuwen Fang, Ming Chen, Hua-ju Li, Tena G. Goodwin, and Peter K. Law Vital marker for muscle nuclei in myoblast transfer 49

Symposium

Starch in human nutrition
(Amidon et nutrition chez l'humain)

University of Saskatchewan, Saskatoon, Saskatchewan, Canada
June 19–21, 1989 / les 19–21 juin 1989

Alison M. Stephen Introduction: Starch in human nutrition 54

Elizabeth Bright-See and Vartouhi Jazmaji Estimation of the amount of dietary starch available to different populations 56

Costas G. Biliaderis The structure and interactions of starch with food constituents 60

R. Hoover and F. W. Sosulski Composition, structure, functionality, and chemical modification of legume starches: a review 79

Thomas M. S. Wolever Small intestinal effects of starchy foods 93

Clarie B. Hollenbeck and Ann M. Coulston The clinical utility of the glycemic index and its application to mixed meals 100

Alessandra Strocchi and Michael D. Levitt Measurement of starch absorption in humans 108

Jay A. Perman Clinical application of breath hydrogen measurements 111

Alison M. Stephen Starch and dietary fibre: their physiological and epidemiological interrelationships 116

J. H. Cummings and H. N. Englyst Measurement of starch fermentation in the human large intestine 121

Michael I. McBurney Passage of starch into the colon of humans: quantitation and implications 130

Recommandations aux auteurs vii

FEBRUARY / FÉVRIER

REGULAR PAPERS / ARTICLES ORDINAIRES

Angèle Parent, Ernesto L. Schiffrin, and Jean St-Louis Receptors for Arg^8-vasopressin, angiotensin II, and atrial natriuretic peptide in the mesenteric vasculature of pregnant rats 137

Peter Cernacek and Mortimer Levy Determinants of atrial natriuretic factor secretion in dogs expanded with isotonic saline or colloid solutions 145

Liang Zhang Effects of 5-hydroxytryptamine on cat spinal motoneurons 154

Robert L. Kline and Graham P. McLennan Chronic hydralazine treatment alters the acute pressure–natriuresis curve in young spontaneously hypertensive rats 164

Walter Fuhr, Karen Russo, and Harvey R. Weiss Effect of vasopressin on myocardial capillary recruitment and coronary blood flow in the anesthetized rabbit 170

Peter T.-H. Wong Characterization by saturation studies of the *in vivo* binding of [^{3}H]flunitrazepam in mouse brain 176

J. Kraicer, M. B. French, B. T. Lussier, B. C. Moor, and P. Brazeau A comparison of the biological activities of authentic rat GRF(1−43)OH with the analogue rat GRF(1−29)HN_2 181

Frank H. Yu, Young W. Yun, Basil Ho Yuen, and Young S. Moon Effects of hydroxyflutamide on rats treated with a superovulatory dose of pregnant mare serum gonadotropin 185

J. C. de la Torre Synergic activity of combined prostacyclin: dimethyl sulfoxide in experimental brain ischemia 191

Allison McKay and Anthony Krantis The effects of ethylenediamine in the rat small intestine: a powerful relaxant of the muscularis 199

W. N. Henley, X. Chen, C. Klettner, L. L. Bellush, and M. A. Notestine Hypothyroidism increases serotonin turnover and sympathetic activity in the adult rat 205

R. K. Minkes, B. D. Nossaman, P. Kvamme, and P. J. Kadowitz Comparative responses to endothelin-2 and sarafotoxin 6b in the pulmonary vascular bed of the cat 211

Thomas C. Poder, Shai D. Silberberg, and David Rampe Contraction of reptile, amphibian, and fish blood vessels by endothelin-1 215

RAPID COMMUNICATION / COMMUNICATION RAPIDE

Flavio Coceani and Lois Kelsey Endothelin-1 release from lamb ductus arteriosus: relevance to postnatal closure of the vessel 218

Symposium

Cellular Aspects of Skeletal Muscle Fatigue
(Les composantes cellulaires de la fatigue du muscle squelettique)

School of Human Biology, University of Guelph, Guelph, Ontario, Canada
January 26−27, 1990 / les 26−27 janvier 1990

J. K. Barclay Introduction to Cellular Aspects of Skeletal Muscle Fatigue Symposium. Muscle fatigue: some issues 224

W. N. Stainsby, W. F. Brechue, B. T. Ameredes, and D. M. O'Drobinak Fatigue of mammalian skeletal muscle *in situ* during repetitive contractions 226

J. N. K. Odim, C. Li, C. Desrosiers, R. C.-J. Chiu, P. J. O'Brien, N. Hamilton, and C. D. Ianuzzo The remodelling of skeletal muscle for indefatigable hemodynamic work 230

Gisela Sjøgaard Role of exercise-induced potassium fluxes underlying muscle fatigue: a brief review 238

Michael I. Lindinger and George J. F. Heigenhauser The roles of ion fluxes in skeletal muscle fatigue 246

R. S. McKelvie, N. L. Jones, and G. J. F. Heigenhauser Factors contributing to increased muscle fatigue with β-blockers 254

Peter James O'Brien, Hua Shen, Janice Weiler, C. David Ianuzzo, Carin Wittnich, Gordon W. Moe, and Paul W. Armstrong Cardiac and muscle fatigue due to relative functional overload induced by excessive stimulation, hypersensitive excitation—contraction coupling, or diminished performance capacity correlates with sarcoplasmic reticulum failure 262

Michael E. Houston and R. W. Grange Torque potentiation and myosin light-chain phosphorylation in human muscle following a fatiguing contraction 269

Kevin K. McCully, B. J. Clark, Jane A. Kent, John Wilson, and Britton Chance Biochemical adaptations to training: implications for resisting muscle fatigue 274

J. K. Barclay and M. Hansel Free radicals may contribute to oxidative skeletal muscle fatigue 279

Richard L. Hughson and John M. Kowalchuk β-Blockade and oxygen delivery to muscle during exercise 285

H. J. Green How important is endogenous muscle glycogen to fatigue in prolonged exercise? 290

Lawrence L. Spriet Phosphofructokinase activity and acidosis during short-term tetanic contractions 298

Ronald A. Meyer, Gregory R. Adams, M. Jill Fisher, P. F. Dillon, Joseph M. Krisanda, Truman R. Brown, and Martin J. Kushmerick Effect of decreased pH on force and phosphocreatine in mammalian skeletal muscle 305

MARCH/MARS

REVIEW / SYNTHÈSE

Fraser W. Scott and Errol B. Marliss Conference summary: Diet as an environmental factor in development of insulin-dependent diabetes mellitus 311

ARTICLES

Eric T. Poehlman, Helen F. Viers, and Mark Detzer Influence of physical activity and dietary restraint on resting energy expenditure in young nonobese females 320

Paul L. M. van Giersbergen, Henk de Lang, and Wybren de Jong Effects of dynorphin A(1−13) and of fragments of β-endorphin on blood pressure and heart rate of anesthetized rats 327

Zhao-Nian Zhou, Sheng-Jing Dong, Eldon R. Smith, and John V. Tyberg Differences in distensibility between the anterior and posterior walls of the left ventricle in dogs 334

G. Y. Minuk, G. E. Rockman, T. Gauthier, L. Markert, J. Gibson, and A. Benarroch The effect of long-term, voluntary ethanol consumption on hepatic regeneration in rats 341

Robert L. Rodgers, Amy J. Davidoff, and Mark J. Mariani Cardiac function of the diabetic renovascular hypertensive rat: effects of insulin and thyroid hormone treatment 346

Worku Abebe and Kathleen M. MacLeod Enhanced arterial contractility to noradrenaline in diabetic rats is associated with increased phosphoinositide metabolism 355

Patrick Herpin, Roseline Bertin, Françoise De Marco, René Portet, and Jean Le Dividich Adipose tissue lipolytic activity and urinary catecholamine excretion in cold-acclimated piglets 362

Rodney A. Webb Characterization of a high-affinity choline uptake mechanism in the cestode *Hymenolepis diminuta* 369

R. A. R. Tasker, B. J. Connell, and S. M. Strain Pharmacology of systemically administered domoic acid in mice 378

N. Jin, C. S. Packer, and R. A. Rhoades Reactive oxygen-mediated contraction in pulmonary arterial smooth muscle: cellular mechanisms 383

C. Lambert, D. Godin, P. Fortier, and R. Nadeau Direct effects in vivo of angiotensins I and II on the canine sinus node 389

Y. Wang, K. G. Baimbridge, and D. A. Mathers Effect of serotonin on intracellular free calcium of rat cerebrovascular smooth muscle cells in culture 393

Pierre M. Bélanger and Serge St-Hilaire The characteristics of the microsomal hydroxylation of tolbutamide 400

Gordon T. Bolger, Francine Liard, Annette Jodoin, and Jorge Jaramillo Vascular reactivity, tissue levels, and binding sites for endothelin: a comparison in the spontaneously hypertensive and Wistar–Kyoto rats 406

Bianca B. Ruzicka and Khem Jhamandas The K^+-evoked release of [^{3}H]acetylcholine from slices of rat globus pallidus: modulation by δ-opioid receptors 414

Luc Levesque, René C.-Gaudreault, and François Marceau The interaction of 3,5-pyrazolidinedione drugs with receptors for f-Met-Leu-Phe on human neutrophil leukocytes: a study of the structure–activity relationship 419

Zhenqiang Wu, Daniel Piché, Sylvie Vallières, Pierre-Michel Huet, and Marielle Gascon-Barré Unimpaired induction of drug-metabolizing enzymes in hepatocytes isolated from rats with micronodular cirrhosis 426

Patricia L. Brubaker, Tsutomu Kazumi, Tsutomu Hirano, Mladen Vranic, and George Steiner Failure of chronic hyperinsulinemia to suppress pancreatic glucagon *in vivo* in the rat 437

APRIL/AVRIL

The 1990 James A. F. Stevenson Memorial Lecture
(La Conférence commémorative James A. F. Stevenson 1990)

Tim D. Braden and P. Michael Conn Gonadotropin-releasing hormone and its actions 445

ARTICLES

Bruce B. Virgo The effects of peripubertal testosterone on ethylmorphine demethylase activity in adult rats testectomized neonatally 459

K. A. King, A. Wong, and J. R. Ledsome The effect of isoproterenol on right and left atrial dynamics and plasma atrial natriuretic factor in anesthetized rabbits 464

N. J. Boudreau and M. M. Vohra The mechanism of [^{3}H]noradrenaline release by histamine and its analogs from the rat vas deferens 469

Ronald P. Brockman Effects of epinephrine on the net hepatic uptake of lactate, pyruvate, and glycerol in sheep 475

Lonnie R. Empey, Laurence D. Jewell, Manohar L. Garg, Alan B. R. Thomson, M. Thomas Clandinin, and Richard N. Fedorak Fish oil-enriched diet is mucosal protective against acetic acid-induced colitis in rats 480

Arpad Tosaki, Isabelle Viossat, and Pierre Braquet Effect of cicletanine on reperfusion-induced arrhythmias and its relation to 6-keto-$PGF_{1\alpha}$ and thromboxane B_2 release 488

Kyosuke Temma, Hiroshi Kondo, and Tai Akera Developmental changes in inotropic actions of neurotoxins observed in ventricular muscle of rat heart 494

S. Heisler Antagonists of epithelial chloride channels inhibit cAMP synthesis 501

John C. Passmore and Agnes E. Jimenez Effect of chloride on renal blood flow in angiotensin II induced hypertension 507

L. Dumont, M. Derouin, C. Chartrand, P. Archambeault, D. Garceau, and G. Caillé Peripheral vasodilator and cardiac properties of the 1,5-benzothiazepine calcium antagonist analog, TA-3090, in dogs 512

E. E. Daniel, J. Jury, R. Serio, and L. P. Jager Role of depolarization and calcium in contractions of canine trachealis from endogenous or exogenous acetylcholine 518

R. P. Green-Thompson, D. S. Riddick, J. E. Mackie, G. S. Marks, and J. R. Halpert Porphyrinogenic effects in chick embryo liver cell culture of chloramphenicol analogues that are mechanism-based inactivators of cytochrome P-450 526

BRIEF REPORT / RAPPORT BREF

Reza Tabrizchi and Christopher R. Triggle Effects of endothelin 3 on diastolic blood pressure of pithed Sprague–Dawley, Wistar–Kyoto, and spontaneously hypertensive rats before and after pretreatment with nifedipine 531

MAY/MAI

The 1990 Pharmaceutical Manufacturers Association of Canada Keynote Lecture
(Conférence inaugurale de la réunion de l'Association canadienne de l'industrie du médicament 1990)

Dennis V. Parke, Costas Ioannides, and David F. V. Lewis The role of the cytochromes P450 in the detoxication and activation of drugs and other chemicals **537**

REVIEW / SYNTHÈSE

Graeme N. Smith, John Patrick, Ken R. Sinervo, and James F. Brien Effects of ethanol exposure on the embryo–fetus: experimental considerations, mechanisms, and the role of prostaglandins **550**

ARTICLES

L. Shoemaker, C. V. Greenway, J. Peeling, G. Sutherland, and G. Tomlinson Quantitative proton nuclear magnetic resonance of plasma for screening hepatic metabolism during ethanol infusion in cats **570**

Kevin K. McCully, Mary Ann Forciea, Laurita M. Hack, Eileen Donlon, Roger W. Wheatley, Carol A. Oatis, Todd Goldberg, and Britton Chance Muscle metabolism in older subjects using ^{31}P magnetic resonance spectroscopy **576**

Susan Hum, Line Robitaille, and L. John Hoffer Plasma glutathione turnover in the rat: effect of fasting and buthionine sulfoximine **581**

J. Clive Ellory and Michael W. Wolowyk Evidence for bumetanide-sensitive, Na^+-dependent, partial Na–K–Cl co-transport in red blood cells of a primitive fish **588**

M. Keelan and A. B. R. Thomson Feeding diets containing 2% cheno- or urso-deoxycholic acid or cholestyramine to rats for two weeks alters intestinal morphology and bile acid absorption **592**

John C. H. Yun, K. Peter Öhman, John R. Gill, Jr., and Harry Keiser Effects of prostaglandins, cAMP, and changes in cytosolic calcium on platelet aggregation induced by a thromboxane A_2 mimic (U46619) **599**

John Ciriello, James K. Simon, and Paul F. Mercer Effect of renal denervation on plasma renin activity after aortic baroreceptor deafferentation **1237**

BRIEF REPORT / RAPPORT BREF

Issei Takayanagi, Hisashi Hagiwara, Katsuo Koike, Tomokazu Hosokawa, and Yutaka Kasuya Effects of the $R(+)$- and $S(-)$-isomers of β-adrenoceptor blockers with intrinsic sympathomimetic activity, befunolol and carteolol, on rabbit intraocular pressure **1243**

SEPTEMBER/SEPTEMBRE

REGULAR PAPERS / ARTICLES ORDINAIRES

A. M. Perks, T. Ruiz, and E. Vanderhorst Lung liquid production by *in vitro* lungs from fetal guinea pigs: studies with metabolic inhibitors 1247

Kristina Torfgård, Johan Ahlner, Krister L. Axelsson, Björn Norlander, and Åke Bertler Tissue levels of glyceryl trinitrate and cGMP after *in vivo* administration in rat, and the effect of tolerance development 1257

W. Y. Chan, Irene Berezin, E. E. Daniel, K. C. Russell, and Victor J. Hruby Effects of inactivation of oxytocin receptor and inhibition of prostaglandin synthesis on uterine oxytocin receptor and gap junction formation and labor in the rat 1262

Zhen Yu and John H. McNeill Force–interval relationship and its response to ryanodine in streptozotocin-induced diabetic rats 1268

Brian M. Bennett, Jake W. Kempenaar, L. Douglas Hayward, and Romy Baur Pharmacokinetic–hemodynamic studies of the enantiomers of isoidide dinitrate in conscious rats 1277

C. V. Greenway Blockade of reflex venous capacitance responses in liver and spleen by hexamethonium, atropine, and surgical section 1284

Yallampalli Chandrasekhar and David T. Armstrong Effects of antiandrogen hydroxyflutamide on progesterone secretion by preovulatory rat follicles in vivo and in vitro 1288

Josette Dangain and Ian R. Neering Effect of low extracellular calcium and ryanodine on muscle contraction of the mouse during postnatal development 1294

Yukiko Fueta and Massimo Avoli Pattern- and age-dependency of the antiepileptic effects induced by valproic acid in the rat hippocampus 1301

Robert L. Rodgers, Amy J. Davidoff, and Mark J. Mariani Erratum: Cardiac function of the diabetic renovascular hypertensive rat: effects of insulin and thyroid hormone treatment 1305

SATELLITE SYMPOSIUM OF THE 13TH SCIENTIFIC MEETING OF THE INTERNATIONAL SOCIETY OF HYPERTENSION
SYMPOSIUM SATELLITE DE LA 13e RÉUNION SCIENTIFIQUE DE LA SOCIÉTÉ INTERNATIONALE D'HYPERTENSION ARTERIÉLLE

Activation and Function of Prorenin: Different Viewpoints
(Activation et function de la prorénine : différents points de vue)

Montréal, Qué., Canada
June 22, 1990 / le 22 juin 1990

D. H. Osmond, J. E. Sealey, and J. K. McKenzie Introduction — Activation and function of prorenin: different viewpoints 1308

Jack D. Barrett and Peter Eggena Trypsin activation of inactive renin: plasma blanks and angiotensin I radioimmunoassay 1315

Paola Ferraris, Patrizia Quorso, Gabriella Gazzano, Massimo Cianci, Carla Sala, Lucia Turolo, Esmeralda Pulazzini, Alberto Morganti, Giancarlo Ambroso, Gabriella Como, Giambattista Candiani, and Filippo Polvani Plasma active and inactive renin and fetal complications in women with high risk pregnancies 1321

Willa A. Hsueh, Yung S. Do, and Pou-Hsiung Wang Observations on the renal processing and sorting of prorenin 1327

P. Ioannou, A. Y. Loh, and D. H. Osmond Activation and measurement of plasma prorenin in the rat 1331

A. Jindra, Jr., J. Bultas, J. Ort, and R. Kvetňanský Investigation of human and rat inactive renin in plasma and kidney 1341

Shokei Kim, Masayuki Hosoi, Kiichiro Nakajima, and Kenjiro Yamamoto Biochemical and immunological differences between plasma inactive renin from normal and nephrectomized rats 1350

P. Lijnen, J. Staessen, R. Fagard, and A. Amery Effect of prostaglandin inhibition by indomethacin on plasma active and inactive renin concentration in men 1355

Masato Matsunaga, Yoko Yamanaka, Noriko Nagano, Yuki Iwasaki, Yumi Saito, Naoko Ando, Shouko Kusumi, and Masahiko Tei Does heparin inhibit renin activity? 1360

Ryuichi Morishita, Jitsuo Higaki, Masahiro Nagano, Hiroshi Mikami, Toshio Ogihara, Toyoo Tanaka, Kenji Ishii, Hideki Okunishi, and Mizuo Miyazaki Consistent activation of prorenin mRNA in renal hypertensive rats 1364

Brian J. Morris and D. Lynne Smith Prorenin and gene activation 1367

A. R. Noble and H. K. Richards Plasma active and acid-activatable renin during the development of one-kidney, one-clip and two-kidney, one-clip hypertension in the rabbit 1375

Knud Poulsen, Arne Høj Nielsen, and Arne Johannessen Measurement of inactive renin in normal, nephrectomized, and adrenalectomized rats 1381

Speranza Rubattu, Fuad Gahnem, and Jean E. Sealey Trypsin activation of human and cat prorenin: a comparative study 1385

Stefano Taddei, Stefania Favilla, and Antonio Salvetti Active and inactive renin in human forearm of hypertensive patients 1390

C. Troffa, G. Tonolo, P. Manunta, A. Pazzola, A. Soro, P. Madeddu, F. Pala, M. G. Melis, P. PinnaParpaglia, G. Patteri, S. Bacciu, G. Sabino, and N. Glorioso Prorenin is present in human red blood cells 1394

OCTOBER/OCTOBRE

REGULAR PAPERS / ARTICLES ORDINAIRES

P. Kubes, K. A. Nesbitt, S. M. Cain, and C. K. Chapler Adrenoceptor regulation of canine skeletal muscle blood flow during carbon monoxide hypoxia 1399

Thérèse Perreault, Josie De Marte, and Flavio Coceani Evidence against the involvement of a cytochrome P-450 mechanism in pulmonary hemodynamics in the newborn pig 1405

T. Dolmage and E. Cafarelli Rate of fatigue during repeated submaximal contractions of human quadriceps muscle 1410

Kenneth M. Johnson and Yow-Juin Jeng Pharmacological evidence for *N*-methyl-D-aspartate receptors on nigrostriatal dopaminergic nerve terminals 1416

James G. McLarnon, Jason H. P. Wong, Dale Sawyer, and Kenneth G. Baimbridge The actions of intermediate and long-chain *n*-alkanols on unitary NMDA currents in hippocampal neurons 1422

Parveen Bawa Effects of tetanic stimulation on monosynaptic and dorsal root reflexes in kittens 1428

Mohamed S. Abdel-Rahman, Alluru S. Reddi, Frederick A. Curro, Rita M. Turkall, Abdelrazak M. Kadry, and Julia A. Hansrote Bioavailability of aspirin and salicylamide following oral co-administration in human volunteers 1436

Roland Savard, Marilyn Ramenofsky, and M. R. C. Greenwood A north-temperate migratory bird: a model for the fate of lipids during exercise of long duration 1443

Frank Christinck, Jennifer Jury, Francisco Cayabyab, and E. E. Daniel Nitric oxide may be the final mediator of nonadrenergic, noncholinergic inhibitory junction potentials in the gut 1448

Ramez Chahine, Mircea Alexandru Mateescu, Stéphane Roger, Nobuharu Yamaguchi, Jacques de Champlain, and Réginald Nadeau Protective effects of ceruloplasmin against electrolysis-induced oxygen free radicals in rat heart 1459

N. J. Rothwell, N. J. Busbridge, R. A. Lefeuvre, A. J. Hardwick, J. Gauldie, and S. J. Hopkins Interleukin-6 is a centrally acting endogenous pyrogen in the rat 1465

Ian Shrier, Sabah Hussain, and Sheldon Magder Failure of oxygen radical scavengers to modify fatigue in electrically stimulated muscle 1470

SATELLITE SYMPOSIUM OF THE 13TH SCIENTIFIC MEETING OF THE INTERNATIONAL SOCIETY OF HYPERTENSION
SYMPOSIUM SATELLITE DE LA 13e RÉUNION SCIENTIFIQUE DE LA SOCIÉTÉ INTERNATIONALE D'HYPERTENSION ARTERIÉLLE

A Decade of ANF Research
(La recherche sur l'ANF a dix ans)

Ottawa, Ont., Canada
June 21–23, 1990 / les 21–23 juin 1990

Adolfo J. de Bold Introduction to A Decade of Atrial Natriuretic Factor Research 1477

Adolfo J. de Bold, Mercedes L. Kuroski-de Bold, Popo H. Boer, Gilles Dubé, Harman Mangat, and Frank Johnson A decade of atrial natriuretic factor research 1480

C. E. Seidman, E. V. Schmidt, and J. G. Seidman *cis*-Dominance of rat atrial natriuretic factor gene regulatory sequences in transgenic mice 1486

Branka Kovacic-Milivojevic, Harold D. Schultz, and David G. Gardner Arachidonic acid metabolites regulate the secretion of atrial natriuretic peptide in cultured rat atrial cardiocytes 1493

Kazuwa Nakao, Masashi Mukoyama, Kiminori Hosoda, Shin-ichi Suga, Yoshihiro Ogawa, Yoshihiko Saito, Gotaro Shirakami, Hiroshi Arai, Michihisa Jougasaki, and Hiroo Imura Biosynthesis, secretion, and receptor selectivity of human brain natriuretic peptide 1500

J. R. Ledsome and K. A. King Atrial dynamics and release of atrial natriuretic factor *in vivo* 1507

Heikki Ruskoaho, Päivi Kinnunen, Pentti Mäntymaa, Paavo Uusimaa, Tarja Taskinen, Olli Vuolteenaho, and Juhani Leppäluoto Cellular signals regulating the release of ANF 1514

Christopher C. Glembotski, Christopher E. Irons, Amy B. Sprenkle, and Catherine A. Sei Studies of ANF processing and secretion using a primary cardiocyte culture model 1525

Mark A. Knepper, Scott P. Lankford, and Yoshio Terada Renal tubular actions of ANF 1537

Bruce A. Stanton Molecular mechanisms of ANP inhibition of renal sodium transport 1546

P. Q. Barrett, C. M. Isales, W. B. Bollag, and R. T. McCarthy Modulation of Ca^{2+} channels by atrial natriuretic peptide in the bovine adrenal glomerulosa cell 1553

Juraj Okolicany, Glenn A. McEnroe, Lisa C. Gregory, John A. Lewicki, and Thomas Maack Effects of small C-ANF receptor ligands on plasma levels of atrial natriuretic factor, blood pressure, and renal function in the rat 1561

Juan M. Saavedra and Masaki Kurihara Autoradiography of atrial natriuretic peptide (ANP) receptors in the rat brain 1567

Mark A. Perrella, Kenneth B. Margulies, and John C. Burnett, Jr. Pathophysiology of congestive heart failure: role of atrial natriuretic factor and therapeutic implications 1576

P. Weidmann, P. Ferrari, Y. Allemann, C. Ferrier, and S. G. Shaw Developing essential hypertension: a syndrome involving ANF deficiency? 1582

G. A. Sagnella, N. D. Markandu, M. G. Buckley, M. A. Miller, D. R. J. Singer, F. P. Cappuccio, and G. A. MacGregor Atrial natriuretic peptides in essential hypertension: basal plasma levels and relationship to sodium balance 1592

Albert Fournier, I. Gregoire, N. El Esper, J. D. Lalau, P. F. Westeel, R. Makdassi, P. Fievet, and A. J. de Bold Atrial natriuretic factor in pregnancy and pregnancy-induced hypertension 1601

Andrea A. Seymour, Benoni Abboa-Offei, Magdi M. Asaad, and W. Lynn Rogers Evaluation of SQ 28 603, an inhibitor of neutral endopeptidase, in conscious monkeys 1609

David L. Garbers The guanylyl cyclase–receptor family **1618**

W. H. Holleman, G. P. Budzik, E. M. Devine, D. M. Pollock, T. J. Opgenorth, A. M. Thomas, T. W. von Geldern, and T. W. Rockway Truncated atrial natriuretic factor analogs retain full agonist activity **1622**

Edmund J. Sybertz, Jr., Peter J. S. Chiu, Robert W. Watkins, and Subbarao Vemulapalli Neutral metalloendopeptidase inhibitors as ANF potentiators: sites and mechanisms of action **1628**
